## SUMMARY

---

Second-year Artificial Intelligence and Robotics student at the Arab American University (AAUP) with a GPA of 3.63. Passionate about artificial intelligence, robotics. Active IEEE volunteer with leadership experience and participation in international programming competitions. Seeking opportunities to apply technical skills through projects, internships, and research activities.

## EDUCATION

---

### Arab American University (AAUP)

Palestine, Jenin

2024 – 2028

BSc in Artificial Intelligence and Robotics

Expected Graduation: July 2028

## LEADERSHIP EXPERIENCE

---

### Vice Chair, IEEE Robotics and Automation Society (RAS) Student Branch

- Assist in organizing technical and educational activities.
- Support student engagement initiatives related to robotics and automation.
- Collaborate with IEEE members to promote professional and technical development.

## ACTIVITIES

---

### IEEE Xtreme Programming Competition Participant

- Participated in the international IEEE Xtreme programming competition.
- Applied problem-solving and programming skills in a competitive environment.

## PROJECTS

---

### Maze Solver Using Python

- Developed a maze-solving project as part of the Introduction to Artificial Intelligence course.
- Applied search and problem-solving concepts using Python.

### Hospital Database System

- Designed and implemented a database system for hospital management.
- Managed patient, doctor, and appointment records using database concepts.

### Darb – Offline-First Emergency Navigation Web App (Software Engineering Course)

- Built a web application that helps users reach destinations as fast as possible, especially in emergency situations.
- Designed the app to work fully offline, ensuring usability at any time regardless of internet availability.
- Developed with HTML, CSS, and JavaScript so it runs on any browser without installation.
- Implemented local data storage using SQLite, with automatic synchronization via Firebase when internet is available.

## CERTIFICATIONS

---

- Machine Learning Course (12 Hours)
- Prompt Engineering Training Workshop

## TECHNICAL SKILLS

---

- Programming Languages: C++, Python
- Technical Knowledge: Data Structures, Database Systems, Artificial Intelligence Fundamentals, Machine Learning Fundamentals
- Tools: GitHub, Microsoft Office

**SOFT SKILLS**

---

- Problem Solving
- Teamwork
